

Custom Function

$$\exp(-A + B/x)$$

SSR = **inf**

δx

δy

| Parameter | Value | Uncertainty |
|----------------------|------------|-------------|
| A [start: 2.60e+01] | 2.600e+01 | nan |
| B [start: -6.00e+03] | -6.000e+03 | nan |

Jacobian not full rank, uncertainties may be zero
